

TERRACE ROOF SYSTEM

RELAX IN THE GARDEN REGARDLESS OF THE WEATHER

“It was one of our best investments – we are spending much more time in the garden now. We don’t have to put away all the stuff and cover our garden furniture when it rains and when the sun is too strong we can always draw the awning. It is just perfect!”

Magda, Gorzów Wlkp.

RELAX IN YOUR GARDEN

...MORE COMFORT, LESS STRESS

Terrace roof system makes your garden a great place for relax, even when the weather is not favorable. You do not have to worry about the weather any more, cover your garden furniture in case of the rain and postpone your meetings with friends – there will be always a good moment for them!

...MODERN TECHNOLOGIES

Aluminium is a great material for such constructions, as it is stable and practically does not need any care and preservation – it is very durable and weather-resistant. The awnings are steered automatically, so you can always very comfortably draw it when the sun is too strong. There is also possibility of installation of the subdued light creating unique atmosphere after dark.

...SOLUTIONS MADE TO MEASURE

Each time we adapt to our customers' needs giving them the best solutions adapted to their terrace – we are able to make the constructions of many different shapes, sizes and forms. Additionally, the roof system may be completed with the side elements protecting from wind.
